

The Dead Transit Time Trap

The Agony of Global Airport Layovers

- 380M international transit passengers annually spend 4 to 12 hours stuck in airports.
- 84% of transit travelers refuse to leave terminals due to fear of missing connecting flights.
- 4-star and 5-star airport district hotels face 40% daytime vacancy between 10 AM and 5 PM.
- Result: ■15,000 Cr (\$1.8B USD) in unmonetized daytime inventory across transit hubs.

The Guaranteed Usable-Time Platform

The Solution for Airport Transit Commerce

- Proprietary transit time engine calculates real usable dwell time after security and customs.
- Guaranteed on-time return to departure gate backed by flight-catch protection.
- 1-Click curated bundles: hourly hotel micro-stay + airport transfer + left luggage guidance.
- Zero anxiety transit exploration booked in under 60 seconds.

Market Opportunity

\$18.4 Billion Global Transit Corridor

- TAM: \$18.4B USD global airport transit hospitality, lounges, and day-use market.
- SAM: \$3.2B USD across key South Asia, Middle East, and APAC transit hubs.
- SOM: \$48M USD initial 15% penetration across Mumbai (CSMIA) and Delhi (IGI).
- High frequency: 4.2 long-haul transit trips per traveler annually.

Product Ecosystem

Seamless Ground & Airside Integration

- Dynamic Dwell-Time Calculator: Accounting for CISF security and deplaning buffers.
- Airside & Landside Micro-Stays: 3h, 6h, and 9h slots at Niranta, ITC Maratha, JW Marriott.
- Airport Left-Luggage Concierge: Direct guidance to official 24/7 arrivals baggage desks.
- Cryptographic Boarding Voucher: SHA-256 HMAC QR vouchers for instant front-desk check-in.

Business Model & Unit Economics

High Margin B2B2C Marketplace

- Average Order Value (AOV): ■3,800 INR (~\$46 USD) per transit booking.
- Take-Rate: 20% platform commission on micro-stays, dining, and chauffeur transfers.
- Gross Margin: ■760 INR (\$9.20 USD) net margin per reservation.
- CAC: ■320 INR (~\$3.80 USD) via programmatic SEO and travel forum acquisition.
- LTV / CAC: 4.8x on single trips, scaling to 7.2x for frequent flyers.

Early Traction & Validation

Mumbai CSMIA Terminal 2 Pilot

- 1,450+ verified layover calculations processed during Mumbai T2 pilot phase.
- 45 guaranteed day-rooms allocated daily across Sahar and Andheri luxury properties.
- 100% on-time flight catch record across all pilot journeys.
- Zero missed flights with 4.8 / 5.0 guest satisfaction rating.

The Moat & Defensibility

Algorithms, Telemetry & Ground Logistics

- Dynamic Transit Time Engine: Real-time traffic surge and weather modeling.
- Multi-Capacity & Atomic Slot Locking: Distributed mutexes prevent booking collisions.
- Curbside Logistics Network: Pre-dispatched chauffeurs at CSMIA P4 parking.
- B2B Hotel Exclusivity: Direct RevPAR booster contracts for daytime off-peak inventory.

Go-To-Market Engine

Zero-to-One Acquisition Strategy

- Programmatic SEO: Dominating high-intent queries (/layover/bom-mumbai/6-hours).
- High-Intent Forums: Authoritative guides on FlyerTalk, Reddit r/travel, and TripAdvisor.
- Airport Co-Marketing: Arrivals guidance cards and baggage tag partnerships.
- Airline Crew & Agent Affiliates: Long-haul crew network word-of-mouth loops.

Competitive Landscape

The OTA Blindspot

- OTAs (MakeMyTrip / Booking.com): Rigid 11 AM checkout / 2 PM check-in model.
- Airport Lounges: Long wait queues, no private beds, and strict 3-hour caps.
- Generic Day-Use Platforms: Lack flight delay radar, airport security, and transfer buffers.
- LayoverX Advantage: Built ground-up for transit flyers with guaranteed flight timing.

The Ask & Growth Milestones

Seed Round: \$350,000 USD on an i-SAFE Note

- Raising: \$350,000 USD (\$3.0M Post-Money Valuation Cap).
- Milestone 1: Scale Mumbai CSMIA T2 to 50 daily bookings (\$70,000 Monthly GMV).
- Milestone 2: Expand to Delhi Indira Gandhi International (DEL Terminal 3).
- Milestone 3: Automated GDS/PNR flight telemetry integration.
- Milestone 4: Reach cash-flow break-even within 14 months with 20% EBITDA.
